Full Stack Developer | IT Student | JavaScript | React.js | Laravel  
| PHP | Passionate about Web Dev at Currently Seeking New  
Opportunities

Deir el-Balah, Gaza Strip

## Summary

As a Full Stack Developer, I am passionate about designing and developing dynamic web applications that provide seamless user experiences. I work extensively with a range of technologies, including front-end frameworks like React.js and back-end solutions such as Laravel and PHP.

Currently, I am in my final semester at Al-Aqsa University in Palestine, achieving a GPA of 95% and earning the first position in my college over the past years. Throughout my academic journey, I have worked on various projects, including website and mobile app design and programming, UI/UX design using Figma, graphic design, motion graphics, as well as Java and JavaFX programming. This diverse experience has equipped me with a multi-skilled background, allowing me to excel in web application programming.

I am a reliable and detail-oriented individual with a strong sense of responsibility. I thrive on challenges and actively seek opportunities to enhance my skills through continuous learning. My analytical mindset enables me to tackle problems systematically and thoughtfully.

I value both independent work and collaboration within a team environment. I take the initiative while respecting my role and effectively organize tasks to ensure project success. I am committed to delivering high-quality work and building authentic relationships with colleagues and clients alike.

I believe in the importance of well-executed projects and consistently aim to exceed expectations in every task I undertake.

---

## Experience

Currently Seeking New Opportunities

Full Stack Developer | IT Student | JavaScript | React.js | Laravel | PHP  
| Passionate about Web Dev

Freelance Developer

Full Stack Engineer

January 2023 - December 2023 (1 year)
